A little outdated but it works Free Word to PDF Converter is a slightly outdated tool as some recent versions of Microsoft Word can convert PDF files internally.. These are usually related to formatting, such as losing the source file's formatting or interpreting it differently, so the PDF comes out looking different to the Word document.. The interface is simple and straightforward, a small window box with the standard Windows color scheme that won't cover up your work view.

Once you start conversion, you'll see a progress bar This simple program is very effective and seems to get conversions right every time, though you never quite know with PDF files.. You should find that you can use the program with a minimum of around 4 clicks, so it's a great time saver if you don't have PDF conversion in Word already.. You'll see four big buttons in the program, for adding files, adding all the files in a folder, removing all files, removing selected files and starting conversion.. The fact is that no two conversion programs are quite the same, with some making mistakes.
